

Property Parcel Information

With The SiteSync Platform you can;
 Search for structures with PowerSearch,
 Plot your propagation with eCoverage,
 Design the backhaul with the Microwave eMwave tool,
 and complete your site planning with the parcel data
 - all in the same tool.

SiteSync is now integrating First American ParcelPoint® to provide another layer of data to help you make more informed decisions for your business. This new feature allows you to access the most comprehensive national parcel database for the United States from First American, one of the nation's largest provider of property information. ParcelPoint® has parcel boundary, centroid and other attributes for over 100 million parcels.

Access is part of 3rd Party Data

The SiteSync Platform™

\$2800.00 / yr

ParcelPoint® can be added to any account.
